

## Creative Front End Developer

The Surely Group is an innovative InsureTech startup, providing a novel online platform for insurers and brokers to transact online with their customers. Founded by experienced serial entrepreneurs in 2013, the company is based in Silicon Roundabout in the heart of London's Shoreditch startup community, serves a blue-chip European client base, and offers a dynamic work environment. The company is growing and is now seeking a talented **Creative Front End Developer** to support its expansion.

### Job Description

We are looking for a creative front end developer with a passion for design and modern frontend development. You will be joining a dedicated and creative team and play an important role in the design and build of modern web applications and mobile apps. You will work closely with end users and back end developers to design dynamic and engaging interfaces, as well as building front end code that bridges the gap between graphical design and technical implementation.

### Responsibilities

- Play an important role in the design and development of modern web applications and hybrid mobile apps
- Create dynamic UX designs and mock-ups with a strong emphasis on usability
- Use your passion for learning new front end development techniques, tools and frameworks to shape the development of our platform user interfaces
- Understand client-side web application design patterns and best practices
- Use your knowledge and skill to improve code usability, maintainability and portability

### Skills and Qualifications

- 3+ years commercial experience
- Expert knowledge of **HTML5**, **Sass** and **CSS** to create easily maintainable and extensible code
- Solid understanding of the **JavaScript** language and the **ES6** specification
- Familiarity with modern frameworks like **Angular** and **React**, as well as older libraries like **JQuery**
- Know how to get the most out of **Bootstrap** and how to implement **responsive design** techniques
- Automating the building and packaging of assets using tools like **Gulp** and **Webpack**
- Understand and be comfortable with using **Git**

The following skills will further put you in a favourable light:

- UX design and mockup experience using tools like **Sketch**, **Marvel** and **Axure**
- Hybrid mobile app development experience using the **Ionic Framework**
- Experience using **PHP** and **TypeScript**
- Understand how to integrate backend services using a **REST API**
- Working knowledge of **SEO** principles and best practices
- JavaScript test automation experience a plus
- Comfortable using **macOS**, **Linux** and **Windows**
- Experience using JetBrains and Atlassian products (WebStorm, Jira and Confluence)

You need the right to work in the UK and must have excellent spoken and written English.

### Compensation and Benefits

The role offers a competitive compensation package, commensurate with experience.

### How to apply

Please send a CV and covering letter to [jobs@surelygroup.com](mailto:jobs@surelygroup.com).
