Symfony Web Application Developer

The Surely Group is an innovative InsureTech startup, providing a novel online platform for insurers and brokers to transact online with their customers. Founded by experienced serial entrepreneurs in 2013, the company is based in Silicon Roundabout in the heart of London's Shoreditch startup community, serves a blue-chip European client base, and offers a dynamic work environment. The company is growing and is now seeking a talented **Symfony Web Application Developer** to support its expansion.

Job Description

We are looking for a developer with a passion for modern web application development using PHP. You will be joining a dedicated and creative team and play a leading role in the design and build of web applications. You will work closely with our Business Analysts, Solution Architect and wider development team.

Skills and Qualifications

Reporting to the CTO, you will ideally have the following skills and experience:

- 3+ years' commercial experience building web applications using **PHP frameworks**
- Experience developing applications using **Symfony 3 or 4**
- Be able to design and construct robust **PHP** applications using **OOP** best practices
- Excellent understanding of **PHP 7**
- Understand **RESTful** service interfaces and REST API best practices
- Familiarity with **MySQL** and **Doctrine ORM**,
- Know how to create and manage **Doctrine Migrations** and **Data Fixtures**
- Have a good understanding of building user interfaces using **Symfony Forms**, **Twig**, **HTML5** and **SASS**
- Value testing and know how to use **Behat** and **PHPUnit**
- Have a working knowledge of **JavaScript** and frameworks like **JQuery** and **Angular**
- Know how to setup your development environment to build and debug Symfony applications
- Understand and be comfortable with using **Git**

The following skills will further put you in a favourable light:

- Experience using **Continuous Integration** tools
- Know how to use build and packing tools like **Gulp**, **Grunt** or **Webpack**
- Experience using Docker
- Comfortable using macOS, Linux and Windows
- Experience using JetBrains and Atlassian products (PhpStorm, Jira, Confluence, Bitbucket)

You need the right to work in the UK and must have excellent spoken and written English.

Compensation and Benefits

The role offers a competitive compensation package, commensurate with experience.
